January 2010

Subject: TIKOSYN[®] (dofetilide) 250 micrograms and 500 micrograms (mcg) Product Shortage
RESOLVED

Dear Certified TIKOSYN Healthcare Professional:

Pfizer would like to inform you that TIKOSYN 250 mcg and 500 mcg are once again available to your patients through normal pharmacy distribution channels.

We apologize for any inconvenience caused by the temporary product shortage of TIKOSYN 250 mcg and 500 mcg. This product shortage occurred as a result of a manufacturing issue and was not the result of any efficacy or safety issues with TIKOSYN. We are taking steps to increase internal inventory levels so as to avoid future product shortages.

We hope the alternative TIKOSYN options made available to fill your patients' prescriptions during the shortage were beneficial for your patients. Please continue to direct any product information questions to **Pfizer Medical Information** at **1-800-438-1985**.

Sincerely,
Angela Hwang
Vice President, US Established Brands
Pfizer Inc
